

Xpert Healthcare Professionals on Demand

Complimentary mdxhealth program

We're excited to offer your patients access to mdxhealth's new patient education program. This service connects your patients with licensed medical doctors (M.D.) who can answer their questions about prostate health and cancer.

Your patients will be able to learn the basics of prostate health directly from our team of experts, empowering them to be more engaged in their care. As an mdxhealth partner, you and your patients have access to this valuable resource at no additional cost.

Our dedicated Xperts are available to answer your patient's questions surrounding prostate cancer:

- Educate about prostate health and cancer
- Provide information on patient journey
- Direct patient to appropriate contacts if needed
- Healthcare professionals will not provide patients with medical advice

Enroll now to join our program for your patients!

Available M-F between 8:00 AM - 5:00 PM PST
