

## Announcing NEW Update to the Resolve mdx UTI test

This communication is to inform you that we are removing *Gardnerella vaginalis* from our Resolve mdx for UTI test. With our UTI test, we want to focus on pathogens present in the bladder and in the urinary tract, not the vaginal vault. Therefore, we will no longer test for *G. vaginalis* on UTI orders received in our lab on or after **Saturday, April 11**. We will, however, continue to include testing for *G. vaginalis* on our Resolve mdx STI test.

- *Gardnerella vaginalis* removed from Resolve mdx for UTI
- Effective **Saturday, April 11**
- No other changes to the UTI test
- *Gardnerella vaginalis* still included on the Resolve mdx STI test
